

ARJUN

Software Developer – AI Enthusiast

+91-8853031432 — arjunkashyap77285@gmail.com — [LinkedIn](#) — [GitHub](#) — [LeetCode](#)

Professional Summary

Detail-oriented Computer Science Engineering student skilled in Python, Java, and AI-based application development. Experienced in building automation systems, secure applications, and intelligent assistants using modern technologies. Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Object-Oriented Programming with a passion for software engineering.

Education

B.Tech in Computer Science Engineering

Noida International University, Greater Noida

2023 – 2027

CGPA - 8.71

Projects

Medx AI Workstation

2026

JavaScript, AI Integration, Web Development

- Developed an AI-driven healthcare workstation designed to assist in medical workflow and diagnostic analysis.
- Built dynamic and responsive user interfaces using modern JavaScript frameworks.
- **GitHub:** github.com/Arjunk7-dev/Medx-Ai-Workstation

Jarvis 2.0 AI Assistant

2026

Python, Speech Recognition, Automation, AI

- Developed an AI-powered voice assistant capable of executing system-level tasks through natural language commands.
- Integrated speech recognition and automation modules for productivity enhancement.
- **GitHub:** github.com/Arjunk7-dev/jarvis-2.0

Word Power Game

2026 — [Live Preview](#)

HTML, CSS, JavaScript

- Built an interactive word-based game to enhance vocabulary and logical thinking skills.
- Developed responsive UI components using modern web technologies.
- Implemented game logic, score tracking, and dynamic user interactions.
- Focused on improving user engagement through a simple and intuitive gameplay experience.
- **GitHub:** github.com/Arjunk7-dev/Word-power-game

Technical Skills

- **Programming Languages:** Python, Java, HTML, CSS, JS, SQL, C
- **Frameworks & Tools:** Flask, Git, GitHub
- **Core Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, OOP
- **Additional Skills:** Problem Solving, Debugging, Cybersecurity Basics, API Integration

Publication

Decentralized AI for Breast Cancer Triage in Low-Resource Settings: Lightweight Deep Learning & Decision Curve Analysis Nov 2025

Journal of Scientific Innovation and Advanced Research (JSIAR) — [View Paper](#) — [View Certificate](#)

- Designed a lightweight TFLite deep learning framework optimized for edge deployment on low-cost devices (e.g., Raspberry Pi) in resource-constrained healthcare settings.
- Achieved an AUC of up to 0.99 using CNN architectures on mammography datasets, ensuring high diagnostic accuracy and high-specificity screening.
- Validated clinical utility via Decision Curve Analysis (DCA), demonstrating superior net benefit over traditional screening policies while drastically reducing radiologist workload.

Certifications & Exposure

- IBM Cloud Computing / Cyber Resilience / Data Analyst — [View Certificate](#) 2026
- AI Impact Summit – Industry Exposure to AI Trends — [View Certificate](#) 2026
- Oracle Cloud Generative AI Professional — [View Certificate](#) 2025
- Accenture Data Analytics Simulation — [View Certificate](#) 2025

Achievements

- Published research paper in AI and healthcare domain (JSIAR)[cite: 2].
- Developed AI-powered automation and assistant-based projects using Python.
- Actively practicing Data Structures and Algorithms on LeetCode.
